CARE AND MAINTENANCE

D-7.3.1.3.4

## USAGE INFORMATION

Follow proper usage guidelines and precautions:

- ▶ Move booths only on solid, stable surfaces. Avoid slippery, uneven, or dangerously sloped floors.
- ▶ Do not move booths with people or weight inside.
- ▶ When moving booths with screens or accessories, avoid abrupt movements and ensure the external power connection is unplugged.
- ▶ Secure the booth with leveling stoppers when in use.

## MAINTENANCE

Disconnect from power before performing maintenance or wet cleaning.

Use a soft cloth dampened with water and neutral soap. Dry with another soft, dry cloth. Do not use abrasive, solvent-based, caustic, or ammonia-based products.

PET surfaces: Remove most stains with abundant water. Do not rub wet PET, as it may cause damage. Use a recognized brand stain remover for stubborn stains.

Clean upholstery with dry foam and other surfaces with a damp cloth.

Avoid abrasive materials when cleaning glass. Use a damp cloth with soapy water or glass cleaner, then dry with a soft cloth.

Do not use cleaning agents containing waxes or silicone oils.

Keep ventilation channels clean for optimal airflow.

Avoid moisture accumulation to prevent damage to structural and electrical components.

## END OF LIFE

For proper end-of-life disposal, refer to the materials recyclability document available on our website.
