

PRESS RELEASE

Mobel Linea launches *Home Office Lite*, dynamic solutions for the home and office that won a design prize.

- ***Home Office Lite – Dynamic Solutions* is a collection consisting of three modular and versatile products designed to provide multi-functionality in the home and address the challenges of a dynamic office.**
- ***Room Divider* is part of this new collection, having won first place at the CETEM Design Award international design competition.**

Under the slogan "your space where, how and when you want", Mobel Linea presents a new collection of products that adapt to the new work lifestyle and integrates into both homes and in offices, making the most of the space and solving all types of needs.

A collection that includes three products: **Room Divider**, **Office Pod** and **Shelving System** are configured in different ways and presented as "solutions" so users can choose the one that best suits their needs and objectives.

A series that is born out of the lockdown, remote work, home offices and the nomadic and dynamic spaces that we find in today's office. A new challenge for the furniture industry, one that represents the next step in Mobel Linea's expansion as it penetrates further into the world of the home.

The entire collection is now available and can be viewed on its [website](#).

Home Office Lite Products:

1. **Room Divider** is based on the need to create a workspace in a few square metres and to separate spaces to provide privacy and create environments. It's a place of work, a clothes hanger/hall tree, a movable board and other possibilities thanks to its modular and customizable assembly. With an agile, versatile, lightweight design that moves so you can store it and transport it easily.

It also won the 27th edition of the prestigious **CETEM DESIGN AWARD** international competition, thanks to its innovative and functional design. "*A revolution in multifunctional spaces*" is how the CETEM jury described the Room Divider.

2. The **Office Pod** is a workspace with a twist. From a dynamic home office to a corner in the office for flexible working, or a reception desk. The Office Pod lets you create and define a multitude of microspaces to adapt to the work rhythm of each moment.
3. The **Shelving System** is a fully customizable storage system that adapts to any space. Its modular nature allows a multitude of configurations to provide practical solutions and easily integrate into any environment, occupying the minimum space. It can be the ideal shelf, desk, hall tree or space divider for both home and office, streamlined, dynamic and full of freshness.
