

## **Mobel Linea shows its extensive and versatile product range at the Orgatec fair on a 450 m2 stand**

*The RB partitions, and especially the various applications of these panels, are the focus this year.*

Mobel Linea presented its vision for new ways of working at Orgatec, the International Office Furniture Fair in Cologne. With an immersive, experiential and intuitive booth, the furniture company from Cervera showed visitors different workspaces separated by the new RB partitions system.

During 4 days of the fair, Mobel Linea valued the office of the future as a space where production and well-being come together in search of a hybrid, flexible, collaborative work culture.

One of the solutions on display is **MUT**, a range of acoustic panels and sound-absorbing accessories that revitalize the character of workspaces and promote acoustic well-being and visual comfort.

Another novelty at Orgatec 2022 is **Home Office Lite**, a collection specially designed to solve multifunctionality for working from home or amplify the challenges of the dynamic office. The product modalities: Room Divider, Office Pod, and Shelving System; the three of them are adaptable to both pace of life and work, modular to integrate with all kinds of needs and ideal for small spaces where it is necessary to make the most of the available space.

Last but not least the company is also working on the reorganization of the range of office chairs in which quality and technology are paramount and where Mobel Linea will clearly be able to offer the best suitable chair for everyone's needs and working environment.
